

Derek Campbell

Fairfax, VA | 703-868-8380 | derek.campbell6940@gmail.com | [LinkedIn](#)

Professional Summary

IT Technician with 2+ years of experience supporting data center operations, network infrastructure, and end-user systems, with hands-on expertise in cabling, switch provisioning, and troubleshooting. Proven ability to execute high-volume infrastructure tasks with consistent on-time delivery, resolve technical issues quickly, and support mission-critical environments. Strong foundation in Linux, Windows Server, networking fundamentals, and AWS, with a focus on maintaining uptime, optimizing performance, and ensuring operational reliability.

Technical Skills

Rack & Stack | Hardware Installations | VLAN Fundamentals | AWS | EC2 | S3 | Linux | Windows Server | CloudWatch

Professional Experience

Allied Universal

October 2025 - Present

Security Operations

Elkridge, MD

- Monitored and secured **high-traffic public facilities**, conducting routine patrols and enforcing safety protocols to maintain a controlled environment.
- Managed **visitor access and incident reporting**, documenting security events and ensuring compliance with site procedures.
- Resolved **customer and public conflicts through de-escalation**, maintaining safety while delivering strong customer interaction.

TLS Crowd Management

May 2025 – October 2025

Event Security

Elkridge, MD

- Provided security support for **large-scale events**, including crowd control and attendee screening to ensure safe operations.
- Identified and mitigated **potential risks in real-time**, contributing to smooth and incident-free event execution.
- Supported event coordination efforts by **maintaining organized entry/exit flow and enforcing safety protocols**.

Direct Line

August 2024 – March 2025

Technician I

Fairfax, VA

- Completed **4–8+ daily data center tasks**, including structured cabling, patching switches, and supporting multi-floor infrastructure deployments, consistently meeting all project deadlines.
- Installed and connected **network hardware and FSDs into switches**, ensuring accurate configurations and improving overall network stability.
- Diagnosed and resolved **connectivity issues caused by incorrect port usage or misconfigured connections**, reducing downtime and restoring service quickly.
- Partnered with network and infrastructure teams to **maintain and scale data center environments**, supporting efficient rollout of new systems and upgrades.

BreakThru Autism Services

May 2020 – August 2024

IT Support Intern

Fairfax, VA

- Resolved **daily hardware, software, and network support tickets**, minimizing downtime and ensuring uninterrupted operations for staff.
- Installed and configured **workstations, printers, and network-connected devices**, improving system accessibility and user productivity.
- Maintained and updated **IT documentation and knowledge base resources**, enabling faster issue resolution and improved team efficiency.
- Managed **IT asset inventory and conducted regular audits**, strengthening equipment tracking and reducing loss or misallocation.

Education

Bachelor of Arts in Computer Technology, Bowie State University

May 2024
